## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Kastan et al. (4,545,691). Kastan et al. discloses a bottom bracket assembly for a bicycle comprising a spindle (60) that is rotatably held in an outer bracket portion (38,72) with two cartridge bearings, each bearing including outer and inner races, wherein the inner races (66) are fit onto said spindle and the outer races (70) are fit into said outer bracket portion, said inner races being fixed on said spindle in both axial directions by abutting inner and outer stop elements (see fig. 7), said inner stop element having a step and said outer stop element being a stop ring (36,94). Kastan et al. further discloses crank arms (10) received in adapting portions (34,92) of said spindle such that the crank arms abut against the outer stop elements in an axial direction. Kastan et al. discloses an outer race mounted in an outer bracket portion such that it is free to move in both axial directions where gaps are provided between the axial end surfaces of said outer race.

### *Response to Arguments*

2. Applicant's arguments, see amendment filed 5/1/03, with respect to the rejection(s) of claim(s) 1-12 have been fully considered and are persuasive. Therefore, the rejection has been

Art Unit: 3682

withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Kastan et al.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
